

ACUPUNCTURE FOR FACIAL ENHANCEMENT

Facial Rejuvenation Acupuncture, "the acupuncture face lift", is becoming a popular, non-surgical method for those who want not only to maintain beauty, radiance and vitality in the face, but also improve their overall health and well being. Acupuncture face lifts have even been featured in the mainstream media, such as on ABC Television's "Good Morning America" and Public Broadcasting System's "Healthweek." A study published in the International Journal of Clinical Acupuncture showed that among 300 cases treated with facial acupuncture, 90% had marked beneficial results with only one course of treatment.

Acupuncture can be used to correct the internal imbalances that create the face's wrinkles, sagging, discoloration, dark circles, or "bags" under the eyes. It helps the body regulate the free flow of Qi and blood to facilitate nutrient absorption, encourages lymph drainage, stimulates the skin's own ability for collagen production, promotes normal secretion from the sweat and oil glands and regulates and stimulates internal organ system function and promotes muscle contraction.

WHAT ACUPUNCTURE CAN DO

Acupuncture for facial rejuvenation is for the person who wants to turn the clock back, look his or her best, feel revitalized, and enjoy it all with good health and a sense of well-being. Some of the effects reported by people undergoing cosmetic acupuncture are:

- Firmer skin and jaw line
- Reduced and softened wrinkles
- Vibrant and more even skin tone
- Reduced or eliminated acne and rosacea
- Increased energy and sense of well being
- Reduced or eliminated hot flashes
- Improved digestion
- Reduction or elimination of insomnia

Acupuncture is far less expensive, more natural, non-invasive and safer than plastic surgery or botox injections, and has minimal side effects, inflammation, or recovery time. Treatment plans are personalized for each patient.
